

# Arjun Puri

Frontend Engineer | Next.js, React, TypeScript, JavaScript, Tailwind |  
Building Reliable, Engaging & User-Centric Web Experiences

Amsterdam, Netherlands

Indian (Dutch Permanent  
Residency)

I'm a frontend engineer with 5 years of experience. I create beautiful, interactive, and accessible applications that prioritise UX and design. I specialise in React, Next.js, TypeScript, and Tailwind. I'm also proficient with animation technologies (Framer Motion), and use them to bring websites to life. My fundamentals are strong, having worked on many vanilla JavaScript projects, along with HTML and CSS/SCSS. I've worked on more than 10 diverse projects in my career and have constantly kept abreast of the latest in the industry through a continuous learning mindset.

I'm detail oriented and have strong interpersonal skills, while my global exposure across five countries helps me adapt to diverse, multi-cultural teams. Outside of coding, I enjoy cooking, DIY projects, gaming, and continuous learning.

## Certifications

\*Please visit my LinkedIn profile to view the credentials of my certifications

React Tutorial      Complete Javascript

Learn Javascript      Testing with cypress.io

## Education

Le Wagon Fullstack Bootcamp | 2019

Ecole hôtelière de Lausanne | 2014 - 2018  
Bachelor of Science - Hospitality Business  
Management

## Skills

	JavaScript		TypeScript
	React		Next.js
	HTML		CSS
	SCSS		Tailwind
	Framer motion		Cypress
	Bootstrap		Jest
	Figma		Git
	Sanity CMS		Accessibility
	Vue		Nuxt
CI/CD			NextUI (HeroUI)
REST			Test Automation
Prisma			Zustand

## Methodologies

Agile, Scrum	Coaching
Pair Programming	Component based design
AI Pair Programming	JavaScript
Functional Programming	

## Languages

English (Native)	French (B1)
Hindi (Native)	Dutch (A2)

# Experience

## Sopra Steria

Frontend Engineer

Previously Ordina, which merged with Sopra Steria in late 2023

Dec 2023 - March 2025 | Netherlands

### CapaCare

NGO Platform – Next.js, React, Typescript, Tailwind, Sanity CMS, NextUI (HeroUI), GitHub Actions

#### Team lead, developer & designer

- Led the development of a long-term web platform for CapaCare, an NGO providing medical training in Africa.
- Responsible for architecture, visual design (Figma), and frontend delivery using Next.js, Sanity CMS, Tailwind and NextUI (HeroUI)
- Developed a scalable, editor-friendly CMS using Sanity
- Reviewed code, coached teammates, and led technical discussions around maintainability
- Served as primary client contact: ran demos, gathered feedback, and aligned on goals throughout
- Built CI/CD pipelines using Github actions to deploy on Vercel

\*As of writing, the new site is yet to go live.

### ToTheRoot

Developer Blog – Vue, Nuxt, Strapi CMS, Typescript, SCSS

- Extended and maintained ToTheRoot, Sopra Steria's internal developer blog platform
- Worked with Vue and Nuxt to implement layout and design improvements
- Led the rebranding to reflect Sopra Steria's brand identity, created the new designs and implemented the frontend changes
- Extended and configured Strapi CMS to streamline content creation

### rAise Program (AI Enablement – Internal)

Contributed 1–2 days/week to Sopra Steria's internal initiative for scaling AI tools across teams.

- Helped onboard over 2,000 developers to GitHub Copilot
- Designed usage tracking strategies to identify workflows where GitHub Copilot had the most impact
- Analysed and presented the collected data to inform internal decision-making and demonstrate AI benefits to clients
- Hosted bi-weekly workshops with AI experts in the company to build networks and help with knowledge sharing

# Ordina

Frontend Engineer

Jan 2021 - Aug 2024 | Netherlands

Worked as a frontend engineer on an array of projects: e-commerce, telecom & open-source public sector platforms. I tackled complex frontend implementations, integrated APIs, working with designers and backenders across stacks to deliver scalable, reliable solutions. Ordina absorbed Clockwork (where I started).

Carried-over Projects from Clockwork

- Prenatal
- Schuurman Schoenen

## VodafoneZiggo

Web Components, JavaScript, SCSS, Cypress, Bootstrap

- Built a product configurator using Web Components, allowing customers to customise telecom bundles with real-time pricing and validation
- Created an advanced address validation component to check bandwidth availability per postcode
- Developed custom HTML emails
- Worked with modern ES6+ standards and Web Components to implement a single-page application
- Implemented a drag-and-drop-style page builder
- Led project handover

## Corona Dashboard, Dutch Ministry of Health

Next.js, React, Typescript, Styled Components, SCSS, Sanity CMS, Visx, GitHub Actions

- Built and maintained features using Next.js, focused on performance, stability, and clarity
- Developed data visualisations using Visx to communicate various data points with graphs and charts
- Migrated the CMS from Sanity v2 to v3, preserving all content structures with minimal disruption to content managers' workflow
- Coached juniors to help them grow within the domains of React, Next.js, CSS and web fundamentals
- Worked closely with analysts, designers, and backenders to ensure the platform remained clear, and usable at all times
- Handled sensitive data and urgent updates, balancing speed and precision under time-sensitive conditions
- Led project handover

# Clockwork

Frontend Engineer

March 2020 - March 2021 | Netherlands

Worked as a frontend engineer on multiple projects (few simultaneously) spanning custom WordPress builds and large-scale e-commerce platforms on Salesforce Commerce Cloud. This role marked my first professional experience using React, but my responsibilities extended beyond UI — I regularly worked on frontend logic and JavaScript-heavy features across diverse client environments.

## WordPress Projects (Bindinc & Paazl)

Wordpress, Gutenberg Editor, React, JavaScript, PHP, SCSS

- Built two fully custom WordPress websites using the Gutenberg block editor (React-based).
- Developed a bespoke theme from scratch — no reliance on theme libraries — tailored to advanced visual designs
- Customised and extended Gutenberg blocks to support unique content and layout needs
- Used PHP and SCSS to create modular, responsive layouts with strong accessibility and editor usability in mind

## Prenatal

E-commerce, Salesforce Commerce Cloud, JavaScript, HTML5, SCSS, Bootstrap

- Integrated the PostNL API for dynamic address validation and completion
- Worked on a product configurator feature for complex item customisation
- Developed advanced form validation logic to handle edge cases in the checkout flow
- Built reusable UI components in vanilla JavaScript
- Contributed to the complete redesign of the checkout process, improving flow and reliability

## Schuurman Schoenen

E-commerce, Salesforce Commerce Cloud, JavaScript, HTML5, SCSS, Cypress, Bootstrap

- Built a custom JavaScript countdown component for campaign promotions, designed for reuse by non-developers
- Developed advanced UI layouts including masonry-style product grids for seasonal campaigns
- Worked on dynamic components that pulled and displayed promotion-specific content
- Contributed to email redesign work, improving consistency and readability across devices

## Additional Projects:

- Denham E-commerce store
- Sole E-commerce Store
- LaDress E-commerce Store
