I'm a frontend engineer with 5+ years of experience building accessible, user-focused web applications using React, Next.js, Javascript/TypeScript, and TailwindCSS. I've delivered greenfield builds, large-scale migrations, and high-traffic projects like the Dutch national COVID dashboard.

I perform well in autonomous, fast-paced environments, taking ownership from concept to deployment while maintaining high code quality. Skilled in async collaboration, I work closely with cross-functional teams to deliver scalable, performant solutions.

Experience

Uw Zorg Online, Health Cloud Initiative – Senior Frontend Developer | 2025–Present

- Leading the frontend for a full product rebuild, working closely with backend engineers on APIs and data flow
- Led migration from a legacy React app to a Next.js application
- Designed a modular frontend system where features are loaded based on customer subscriptions
- Set up and maintained a Turborepo monorepo, improving build times and code reuse across the project
- Reduced CI/CD build times by ~50% (8+ minutes → under 4 minutes)
- Created a package generator to speed up and standardise new monorepo package setup
- Used AI-assisted workflows (Codex, Claude) to speed up development and delivery

Sopra Steria, formerly Ordina – Senior Frontend Developer | 2021–2025

- Key Projects: CapaCare, Dutch Corona Dashboard, VodafoneZiggo, Blokker
- Delivered greenfield web platforms, large-scale CMS migrations, and high-traffic applications for national and enterprise clients. Worked in cross-functional teams to ship scalable solutions under tight deadlines.
- Worked on data heavy projects like the Corona Dashboard using Visx for data visualisation.

Clockwork – Frontend Developer | 2020–2021

- Key Projects: Prenatal, Schuurman Schoenen, WordPress (Bindinc, Paazl)
- Built custom e-commerce features, checkout optimisations, and reusable components improving UX and conversion rates.

**Full experience section with project details can be found on the following pages*

Key Skills

Typescript, HTML, CSS, SCSS, Next.js, React, TailwindCSS, Framer Motion, Zustand, Sanity CMS
NPM, Pnpm, Vite, Webpack, Git, Github Actions, Vercel, Docker, CI/CD, Turborepo, Teamcity Pipelines
Cypress, Jest, Prisma ORM, Server-side rendering, Static Site Generation, Functional Programming, Atomic Design, Domain Driven Design, Modular Design

**Categorised skills can be found on the last page*

Experience Expanded

Senior Frontend Developer at Uw Zorg Online, Health Cloud Initiative

October 2025 - Present

One of the largest digital healthcare platforms in the Netherlands, enabling users to manage healthcare online through appointments, prescriptions, medical records, and provider communication. It serves millions of users.

Contributions

- Leading the frontend for a full product rebuild, collaborating closely with backend engineers on API design, data flows, and integration patterns
- Led migration from a legacy React application to a Next.js application, improving scalability, performance, and aligning the codebase with current best practices
- Leveraged AI-assisted development (Codex and Claude) with structured workflows to accelerate feature delivery
- Designed and implemented a modular frontend architecture where features are dynamically loaded based on customer subscriptions
- Set up and maintained a Turborepo monorepo to enable shared code, faster builds, and better separation of concerns
- Built and maintained a fully accessible component library using Storybook to standardise UI patterns and speed up delivery
- Reduced CI/CD build times by ~50% using Turborepo caching
- Improved development velocity by creating a monorepo package generator, reducing manual setup and ensuring consistency across packages
- Collaborated with product, design, and backend teams to deliver user-focused features

Senior Frontend Developer at Sopra Steria, Formerly Ordina

January 2021 - March 2025

An IT consultancy where I worked on multiple projects. The previous company I worked for, Ordina, merged with Sopra Steria.

Projects

CapaCare - Team lead, Senior Frontend Developer, Designer

A custom web platform for an NGO promoting medical training in Africa, featuring editable content, blog publishing, and e-commerce functionality.

Contributions

- Led the end-to-end development of a greenfield web platform for CapaCare, an NGO focused on medical training in Africa — covering architecture, visual design (Figma), and frontend implementation.
- Built a scalable, editor-friendly headless CMS with Sanity to streamline content management and improve flexibility.
- Served as primary client contact, running demos, gathering feedback, and ensuring alignment on goals and deliverables.
- Set up CI/CD pipelines with GitHub Actions and mentored teammates through code reviews and

technical decision-making.

Tech: Next.js, React, Tailwind, Typescript, Sanity CMS, CSS, HTML, Stripe, Framer-Motion, Vercel, Github Actions, NextUI, Jest, Github

Corona Dashboard - Frontend Developer

The Dutch Ministry of Health's national COVID Dashboard. Serving the entire country of the Netherlands. It was a data intensive platform composed mostly of data visualisations.

Contributions

- Built and maintained critical features in Next.js/TypeScript for a national public health dashboard, optimizing performance, stability, and accessibility for millions of users.
- Developed interactive data visualisations using Visx to present critical public health information.
- Led the large-scale CMS migration from Sanity v2 to v3 while introducing optimisations for content managers.
- Coached junior developers in React, CSS, and web fundamentals, improving overall team output and code quality.
- Collaborated with researchers, designers, and backend engineers to deliver accurate, time-sensitive COVID-19 data to the public.

Tech: Next.js, React, Typescript, Styled Components, HTML, CSS, SCSS, Sanity CMS, Visx, GitHub Actions, Git, GitHub, Docker, Monorepo

ToTheRoot - Frontend Developer

Contributed to the development of the company's internal developer blog platform in between other client projects.

Contributions

- Improved layout, design, and frontend architecture using Vue and Nuxt for the company's internal developer blog platform.
- Led a full rebranding effort, creating new designs and implementing the updated frontend to align with the company's identity.
- Extended and configured Strapi CMS to simplify content creation workflows for internal contributors.

Tech: Vue, Nuxt, Strapi CMS, Typescript, SCSS, HTML, Git, Github, Docker

VodafoneZiggo - Frontend Developer

Contributed to the creation of VodafoneZiggo's brand new B2B commerce web platform.

Contributions

- Built a product configurator with native Web Components, enabling customers to customise telecom bundles with real-time pricing and validation.
- Developed an advanced address validation component to check bandwidth availability by postcode.
- Implemented a drag-and-drop page builder to allow content managers to create and edit pages rapidly

without developer intervention.
- Delivered a single-page application using modern ES6+ standards and native Web Components.
- Led the technical handover, ensuring a smooth transition to the client's in-house team.

Tech: Web Components, JavaScript, ES6+, HTML, CSS, SCSS, Bootstrap, Cypress, Git, BitBucket, Salesforce Commerce Cloud

Blokker - Frontend Developer

Blokker, one of the largest department stores in the Netherlands, wanted to completely redesign their checkout page and introduce new shipping methods.

Contributions

- Collaborated with the design team to enhance the checkout flow UX, contributing to a measurable increase in conversion rates.
- Led all frontend development for the project, ensuring responsive design and high performance across devices.
- Contributed to the Node.js backend to improve integration with the frontend and streamline data flow.

Tech: JavaScript, HTML, CSS, SCSS, Git, BitBucket, Cypress, Bootstrap, jQuery, Salesforce Commerce Cloud, Node.js

---

Frontend Developer at Clockwork

March 2020 - March 2021

Clockwork was a leading digital agency in Amsterdam which was absorbed by Ordina. I worked on multiple projects, a few simultaneously - from WordPress to E-commerce. Some of my projects at Clockwork were carried over to Ordina.

Projects

WordPress Projects (Bindinc & Paazl) - Full Stack Developer

Contributions

- Built two fully custom WordPress websites using the React-based Gutenberg block editor.
- Developed bespoke themes from scratch, avoiding reliance on pre-built theme libraries.
- Customised and extended Gutenberg blocks to support complex layouts and unique content structures.
- Created modular, responsive layouts with PHP, Twig, and SCSS, ensuring strong accessibility and a focus on editor usability.

Tech: WordPress, Gutenberg Editor, React, JavaScript, HTML, SCSS, CSS, PHP, Twig

Prenatal - Frontend Developer

Prenatal is the leading e-commerce store for all things related to pregnancy and babies. I contributed to the introduction of new features to the platform.

Contributions

- Integrated the PostNL API to enable dynamic address validation and autocompletion, improving the checkout user experience.
- Developed the frontend for a complex product configurator for baby stroller customisation.
- Implemented advanced form validation logic to handle edge cases in the checkout flow.
- Contributed significantly to a full checkout redesign, focused on improving conversion rates.

Tech: JavaScript, jQuery, HTML5, SCSS, CSS, Bootstrap, Git, BitBucket, Salesforce Commerce Cloud

**Project carried over to Ordina/Sopra Steria*

Schuurman Schoenen - Frontend Developer

Schuurman Schoenen is a top rated shoe store in the Netherlands with a strong e-commerce presence. I contributed to the development and upkeep of the website.

Contributions

- Built a reusable JavaScript countdown component for campaign promotions, enabling non-developers to add it via a drag-and-drop page editor.
- Developed advanced UI layouts, including masonry-style product grids for seasonal campaigns.
- Implemented dynamic components to display real-time, promotion-specific content.
- Contributed to an email template redesign, improving the experience across devices.

Tech: JavaScript, jQuery, HTML5, SCSS, CSS, Bootstrap, Git, BitBucket, Salesforce Commerce Cloud

**Project carried over to Ordina/Sopra Steria*

Additional Projects at Clockwork

- Denham E-commerce store
- Sole E-commerce Store
- LaDress E-commerce Store

Skills

Languages, Frameworks, and Libraries

TypeScript, JavaScript, HTML, CSS, SCSS
React, Next.js, TailwindCSS, Bootstrap, Framer Motion, Zustand, React Query, jQuery, Vue, Nuxt.js

Tooling & DevOps

Vite, Webpack, NPM, Yarn, Git, GitHub Actions, Vercel, Docker, CI/CD, Monorepo, Turborepo, Teamcity, Octopus Deploy

CMS & Platforms

Sanity CMS, Strapi CMS, WordPress

Testing

Cypress, Jest, Test Automation

Database & APIs

Prisma ORM, REST

Methodologies

Functional Programming, Atomic Design, Server-Side Rendering (SSR), Static Site Generation (SSG), Agile, Scrum, Pair Programming, Async Collaboration
